Measurement technology | METPOINT[®] UD01/UD02

METPOINT[®] UD01/UD02: All information at your fingertips - on site

Many production and treatment processes can only be run efficiently if real-time data is available on site. Without this information, it is impossible to closely monitor the quality of applications and processes and take swift action, if the need arises.

The METPOINT[®] UD01 and UD02 plug-on displays make measuring data available directly at the transducer - where you need it. You

P. C.

are then in a position to evaluate the quality of your processes in real time right at the plant, enabling you to intervene quickly should it be necessary. Simply mount the device on your transducer.

Apart from displaying the current process parameters, the plug-on displays also allow for the transfer of the measurements to a data logger such as the METPOINT[®] BDL or to a master control system.

The UD02 plug-on display comes with two integrated alarm contacts that enable you to implement visual and acoustic alarm signals.

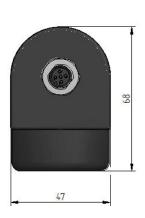

- > Flexible integration
- > Easy and quick to install
- > User-friendly display
- > Integrated diagnostics
- > Intuitive configuration options
- > Reliable on-site display

METPOINT® UD01

Display of quality parameters

| Technical data | | | |
|------------------------------------|---|--|--|
| Outputs | 4 20 mA (2-wire) | | |
| Electrical protection | | | |
| Short-circuit resistance | permanent | | |
| Polarity reversal pro- tection | No damage, no function | | |
| Electromagnetic com- patibility | Emitted interference and interference resistance according to EN 61326 | | |
| Safety limits | U = 28 V, ∑I = 93 mA, ∑P = 660 mW | | |
| Display | | | |
| Туре | Four-digit red LED display, digit height 7 mm, dig- it width 4.85 mm | | |
| Range | -1999 +9999 | | |
| Accuracy | 0.1 % ± 1 digit | | |
| Digital attenuation | 0.3 30 s (programmable) | | |
| Display update frequency | 0.0 10 s (programmable) | | |
| Mechanical strength | | | |
| Vibration | 5 g RMS (20 2000 Hz) | | |
| Shock | 100 g / 11 ms | | |
| Operating temperature | -25 +85 °C | | |
| Storage temperature | -40 +85 °C | | |
| Housing material | PA 6.6, polycarbonate | | |
| Weight | approx. 100 g | | |
| Data memory | EEPROM, non-volatile | | |
| Protection class | IP 65 | | |

METPOINT[®] UD02

Display of quality parameters

| Technical data | | |
|------------------------------------|---|--|
| Outputs | 4 20 mA (2-wire) | |
| Switching outputs | | |
| Number, type | Max. 2 independent PNP open collector contacts | |
| Switching power | USwitch = UB - 2 V; max. load 125 mA, short-circuit proof | |
| Max. switching cur- rent | 70 mA | |
| Reproducibility | $\leq \pm 0.1$ % Full Scale Output (FSO) | |
| Switching frequency | max. 10 Hz | |
| Switching cycles | > 100 x 10 ⁶ | |
| Delay | 0 100 s | |
| Electrical protection | | |
| Short-circuit resist- ance | permanent | |
| Polarity reversal pro- tection | No damage, no function | |
| Electromagnetic com- patibility | Emitted interference and interference resistance ac- cording to EN 61326 | |
| Safety limits | U = 28 V, ∑I = 93 mA, ∑P = 660 mW | |
| Display | | |
| Туре | Four-digit red LED display, digit height 7 mm, digit width 4.85 mm | |

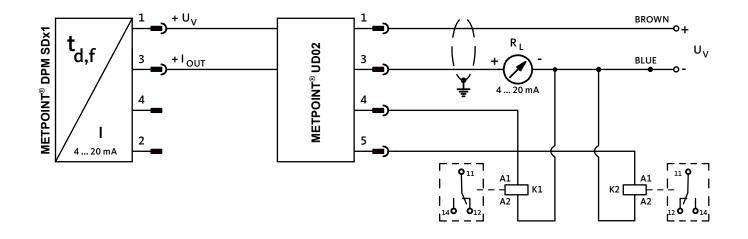

| Range | -1999 +9999 | |
|-----------------------------|-------------------------|--|
| Accuracy | 0.1 % ± 1 digit | |
| Digital attenuation | 0.3 30 s (programmable) | |
| Display update frequency | 0.0 10 s (programmable) | |
| Mechanical strength | | |
| Vibration | 5 g RMS (20 2000 Hz) | |

Wiring example: connection of UD02 for control of external changeover contact for alarm lights, etc.

K1 / K2 relay module

Type: EMG 10-REL/KSR-G 24/21-LC

| Excitation side: | |
|------------------------------|-----------------------------|
| Excitation side: | 4 20 mA (2-wire) |
| Input voltage: | 24 VAC |
| Typical input current: | 21 mA |
| Contact side: | floating changeover contact |
| Max. switching voltage: | 250 V AC/DC |
| Max. switch-on current: | 8 A |
| Limiting continuous current: | 6 A |

Principle of operation of METPOINT[®] UD01/UD02:

The METPOINT[®] UD01/UD02 plug-on displays are compatible with all transducers that come with a 4 ... 20 mA / 2-wire analog output. The display is installed between the plug and the cable box and is instantly ready for operation. It can be programmed by means of a menu system and two push buttons. The programmed parameters are stored in EEPROM so that they are not lost in the event of a power failure. Exceedance will result in messages that inform the operator of a problem. Alarms are indicated by LEDs located beside the digital display, and the relevant switching contacts are activated. The device is shipped with a number of unit labels.

Do you have questions about the best way of processing compressed air?

We have the answers! We offer efficient solutions for any type of processing. Please contact us with all your queries.

We would be delighted to tell you more about our condensate treatment, filtration, drying, measuring technology and process technology, as well as our extensive services.
