

Working together on efficient production

Specialist in compressed air systems, pumps, and technical components

WE CONTROL YOUR FLOW

We are Luitec

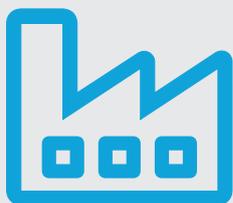

A young family-owned company with over 30 years of experience as an industrial supplier and service provider in compressed air systems, pumps, and technical components. With a team of around 15 dedicated employees, we work every day to reduce maintenance costs and provide full support to our customers.

Versatile across industries

Each industry comes with its own set of standards – from the strict regulations of the pharmaceutical and food industries to the high-quality standards in yacht and shipbuilding. Thanks to years of hands-on experience across a wide range of applications, our specialists are well-versed in the latest industry standards.

Pharma & Food

General Industry

Yacht & Shipbuilding

Water Utilities

Transport & Logistics

From standard compressors to custom solutions

Luitec offers a wide range of high-quality compressed air systems for applications across various industries. In addition to compressors and air treatment solutions, we provide systems for extraction and climate control. Our product range also includes a wide selection of pumps, flow and drive technology components, and complete workshop equipment. We exclusively partner with trusted suppliers known for their quality and reliability.

Workshop equipment & tools

Our partners

A man with glasses and a dark sweater is working on a large, circular mechanical component on a workbench. He is looking down at the part with a focused expression. The workshop background is filled with various tools and equipment, including another similar component on the right. The entire image has a blue color cast.

„We believe personal contact is important, because through good communication we can arrive at the best solution. Technology with a human touch – that’s what we believe in.“

From concept to completion – all in one hand

In addition to advising and supplying high-quality compressed air installations and pump systems, we're happy to take the load off your shoulders with our complementary services. From designing tailor-made, energy-efficient compressed air systems to selecting the most efficient pump solution, and from leak detection in compressed air networks to aligning pump units – we handle your entire process, from concept and realization to on-site installation and maintenance. Discover some of our services.

Compressed air installations & conditioning

Luitec is your partner for the design and installation of compressed air systems. We translate your specific compressed air requirements into a customized, energy-efficient solution. Our service team ensures a ready-to-use installation, providing complete peace of mind.

Compressed air systems maintenance

In addition to supplying and installing compressed air systems, we offer a comprehensive maintenance program. Our maintenance services include periodic servicing and breakdown support, provided under a service contract tailored to your needs. Commissioning is also part of our offering, both domestically and abroad.

Pump Maintenance

We provide services ranging from fixing pump malfunctions to full maintenance of your rotating equipment. Working in confined spaces, including in the maritime sector, is no challenge for our team. We also offer expert advice on improving your sealing systems to maximize pump longevity and performance.

Leak detection

To prevent unnecessary energy costs due to compressed air loss, Luitec utilizes advanced measuring equipment to identify leaks. We provide all necessary replacement parts, and our service technicians repair the leaks efficiently.

Van Stenis Group in a nutshell

Luitec is part of the Van Stenis Group. The name Van Stenis Group reflects the close collaboration between Luitec, Sellon, and Startflow – companies operating in the same industries, each with their own expertise. What unites us? All our products and services are focused on optimizing the “flow” within your production process.

STARTFLOW

Startflow is your industrial supplier and service provider within the process industry - from advice to installation, from engineering to assembly and maintenance of components and systems. We provide complete support in the field of process valves and pneumatic control technology.

SELLON

Sellon is your industrial service partner for improving reliability and extending the lifespan of your rotating equipment. In addition to providing expert service, Sellon is also your supplier of high-quality seals, industrial pumps and technical maintenance products.

VAN STENIS SERVICES

Van Stenis Services is your maintenance provider for pumps, valves, and compressed air systems. With the combined expertise of technicians across the Van Stenis Group, we handle maintenance and troubleshoot issues to keep your installations running smoothly.
